

Managed care solutions that reduce costs, enhance revenue opportunities and increase productivity

Innovative Resources for Payors

IRP provides solutions and services for insurance carriers, third-party administrators, HMOs, PPOs, self-insured employers and other payor organizations.

Experience That Counts

With more than 250 clients and more than 15 years of experience in the managed care marketplace, our people and systems help payors achieve unprecedented claims automation.

Resources that Matter

You remain in control of your data while gaining a competitive advantage through the knowledge and expertise of our in-house healthcare financial professionals.

Implementation Made Easy

Our technical staff assists each client throughout data migration, system installation, testing and training. We provide dedicated project management and account management services to ensure minimum disruption.

Our knowledge and technology improve the accuracy and efficiency of your Claims Management

Our Claims Management/Contract Modeling tools reduce costs. Our Strategic Contracting tools enhance revenue opportunities. And our custom, integrated Groupers and Pricers raise productivity. IRP is right for you when you:

- Compete internally for scarce IT resources or you need predictable IT costs
- Seek to evolve quickly with changes in EDI automation
- Realize that contract methodology exceeds your system capabilities or you need tools to support contract negotiation
- Understand the difficulty in keeping up with constant regulatory changes related to government reimbursement systems
- Need high performance, native grouping and pricing applications for your hardware platform

CLAIMS MANAGEMENT/ CONTRACT MODELING

Claims Repricing

Our proprietary repricing technology eliminates slow, error-prone processes to establish workflows that generate measurable cost savings.

Medicare Advantage Support

Long recognized as experts in Medicare reimbursement, our experience works to your advantage, because we have flexibility in our ability to calculate provider reimbursement – including percentages of Medicare for specified contracts – and by the capability to choose selective Medicare edits while maintaining your compliance with federal regulations.

Contract Management

The IRP Contract Manager helps you locate contracts and manage your contract inventory. And IRP handles tracking of effective dates and negotiations for you.

Online Modeling

We offer online modeling and analysis tools as well as outsourced contract modeling services.

STRATEGIC CONTRACTING

IRP's Strategic Contracting module delivers valuable charge, cost and mark-up information. A Web-based application using the latest Outpatient Prospective Payment System (OPPS) data supplied by CMS, it lets you identify how a provider organization's pricing compares with its peers.

We also offer all comparative cost and charge reports by which you can remove outliers from your calculations to arrive at the calculation of the mean charge and cost by HCPCS code.

GROUPERS AND PRICERS

We are the leader in code-based patient classification and reimbursement solutions. Fast and accurate, our solutions perform on more than 20 hardware platforms. Our DRG Grouper is designed for high performance and ease of integration into existing applications. Our APC Grouper determines accurate APC assignment by evaluating the diagnoses and procedure codes and grouping in accordance with OPPS regulations.

IRP's DRG Pricer is a DRG payment and pricing component designed to work with DRG Grouper. Our APC Pricer – an APC payment and pricing component – provides the flexibility to customize rules and payment rate methodologies. Together, APC Pricer and APC Grouper produce complete and accurate results. DRG and APC Pricer will accurately price all U.S. Hospitals under PPS pricing.
